

A-69 Additive

Crater and Fish Eye Eliminator

General Properties

A liquid stir-in additive designed to help control fish eyes, craters, pinholes or other surface defects in industrial solvent based paints. This product also reduces dry spray effects and improves wetting.

Recommended Uses

For use in two component polyurethanes, epoxy finish coats, baking enamels and fast dry enamels.

Product Information

GENERIC TYPE

Polysiloxane Copolymer

INDUCTION TIME

30 minutes (see mixing instructions)

COLOR

Crystal clear

POT LIFE

No effect

AVERAGE VOLUME SOLIDS

12%

VISCOSITY MIXED

No effect

AVERAGE WEIGHT SOLIDS

12.5%

Warning

A-69 is not recommended for use in primers. Reactability and adhesion can be adversely affected by high temperatures.

Limitations

This product is designed to minimize the cratering or fish eye problems caused by airborne dust and contamination. It is not designed to offset the effect of poor surface preparation or air line contamination.

Mixing Instructions

For best results, add to component A and allow to infuse for 30 minutes prior to catalyzing with component B at levels between 30 - 60 mL / mixed gal. **Do not exceed this level.** This product can be added to catalyzed product but with lesser performance results.

Safety Precautions

This product is for industrial use only. **Refer to Material Safety Data Sheet for proper health and safety information.**
